

ONLINE EDUCATIONAL RESOURCE GUIDE - FOR PARENTS

Designed intentionally for parents searching for high-quality, content specific, online educational sources and tools to help facilitate online education. Of course, you may already have your student's assigned coursework. This guide is not that. This guide is designed to be more of the educational frosting (or hook) into subjects/exploration. The guide does not replace repetition or practice but does provide sources for inquiry in learning.

Dear Parent/Friends -

Online classes aren't going away, in fact, enrollments are on the upswing and continue to grow. Online education increases access who for those who would otherwise not be able to access education in the traditional classroom. The recent global pandemic has forced us online. Luckily, and in spite of world issues, we both have the technological resources and support to move the direction of online educational content. This online educational resource guide provides the tools to incorporate high quality sources into your strategic and standards based curricula.

Attached are my top 25+ that I plan to use in my own home in some form or another, and that's saying something, because I've seen it ALL in my quarter of a decade education career. Some of the resources are too good to keep to myself. Enjoy the share and happy learning!

D-Day Robert Capa 1944

It was the invasion to save civilization, and LIFE's Robert Capa was there, the only still photographer to wade with the 34,250 troops onto Omaha Beach during the D-Day landing. His photographs—infused with jarring movement from the center of that brutal assault—gave the public an American soldier's view of the dangers of war. The soldier in this case was Private First Class Huston Riley, who after the Nazis shelled his landing craft jumped into water so deep that he had to walk along the bottom until he could hold his breath no more. When he activated his Navy M-26 ball-tie preserver and floated to the surface, Riley became a target for the guns and artillery shells moving down his comrades. Struck several times, the 22-year-old soldier took about half an hour to reach the Normandy shore. Capa took this photo of him in the surf and then with the assistance of a sergeant helped Riley, who later recalled thinking, "What the hell is this guy doing here? I can't believe it. Here's a cameraman on the shore." Capa spent an hour and a half under fire as men around him died. A courier then transported his four rolls of film to LIFE's London office, and the magazine's general manager stopped the presses to get them into the June 19 issue. Most of the film, though, showed no images after processing, and only some frames survived. The remaining images have a grainy, blurry look that gives them the heroic feel of action, a quality that has come to define our collective memory of that epic clash.
