

# Introduction to Circles Geometry

Identify the radii, chords, and diameters.

Identify the tangents and secants.

Name the minor arcs and semi-circles.

Name the major arcs, minor arcs, and semi-circles.

Identify the central and inscribed angles.

Given the length of the radius or diameter, find the other measure.

$r = 7$  in.

$d = 6$  cm

$d = 18$  mi

$r = 13$  m

$d = 34$  yds

$r = 24$  ft
