

Postulates

For problems 1 - 24 refer to figure 1.1.

1) Give three collinear points in plane V.

3) Give three coplanar points in plane V.

5) Give a point coplanar with points B, E, and D.

7) Give a point noncoplanar with points B, C, and F.

10) Give four coplanar points.

13) Give three collinear points not all in plane V

16) What is the intersection of line BG and plane CDE?

19) What is the intersection of line EG and line AE?

22) Points H and F are contained in how many lines?

2) Give three noncollinear points in plane V.

4) Give three coplanar points not in plane V.

6) Give a point noncoplanar with C, H, and D.

8) Give a point coplanar with B, C, and F.

11) How many planes contain Points B, C, and F?

14) Point D and point F are contained in which line?

17) What is the intersection of line CD and plane V?

20) How many planes contain points A, C, and G?

23) How many lines contain points A, C, and G?

Fig
1.1

9) Give four noncoplanar points.

12) How many planes contain points B, C, and E?

15) What is the intersection of line AG and line BE?

18) What is the intersection of line CF and line DC?

21) What is the intersection of line AG and plane V?

24) How many lines are defined by points B, C, and F?

For problems 25 - 37 refer to figure 1.2.

25) Give two sets of collinear points in plane C.

27) Give three noncollinear points in plane D.

29) Give a point coplanar with points P, Q, and V.

31) Give a point coplanar with points P, X, and Q

33) Name the plane containing points Q, V, and P.

35) What is the intersection of line PZ and line RP?

26) Give a set of collinear points not in plane WYR.

28) Give a point in plane C not collinear with points T and R.

30) Give a point not coplanar with points T, Q, and R.

32) What is the intersection of plane PQR and plane C?

34) What is the intersection of line TW and line QV?

36) What is the intersection of plane RVP and line WZ?

Fig.
1.2

35) How many planes contain points Q, R, and V?

37) What is the intersection of line TR and plane C?
