

Linear Equations 1

Use a t-table to graph the following equations and give their slope.

1) $-2x + y = -6$

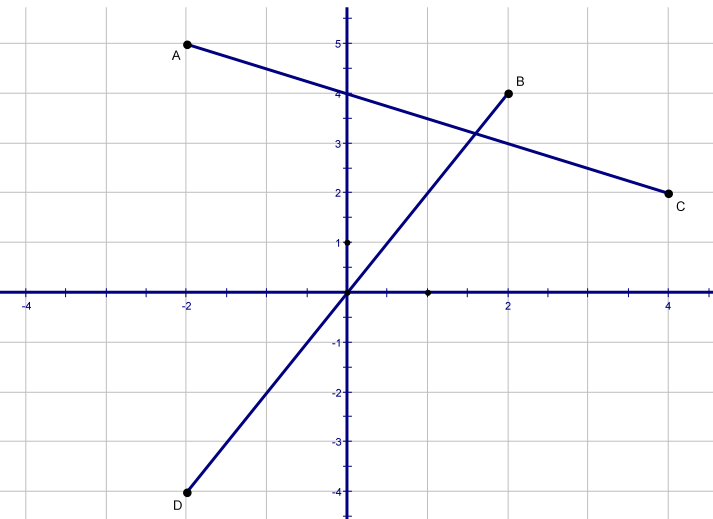

2) $x - 3y = 9$

3) $2x - 2y = 8$

4) $2x + 5y = 10$

Find the length and slope of the segments graphed below.

5)

6)
