

## Linear Equations 2.2

### Geometry

Use a t-table to find the x and y-intercepts and one other solution of the following equations. Graph the equations, label the points, and give the slope of the graph.

1)  $x = y + 2$

2)  $y = 2x + 1$

3)  $4x + 2y = 4$

4)  $6y - 3x = 12$

5)  $y = 4$

6)  $-2x + 5y = 8 + 5y$
