

Introduction to Circles B Geometry

Identify the radii, chords, and diameters.

Identify the tangents and secants.

Name the minor arcs and semi-circles.

Name the major arcs, minor arcs, and semi-circles.

Identify the central and inscribed angles.

Given the length of the radius or diameter, find the other measure.

$r = 12 \text{ in.}$

$d = 14 \text{ cm}$

$d = 28 \text{ mi}$

$r = 9 \text{ m}$

$d = 85 \text{ yds}$

$r = 36 \text{ ft}$
